

Bay Window Box Car Caboose:

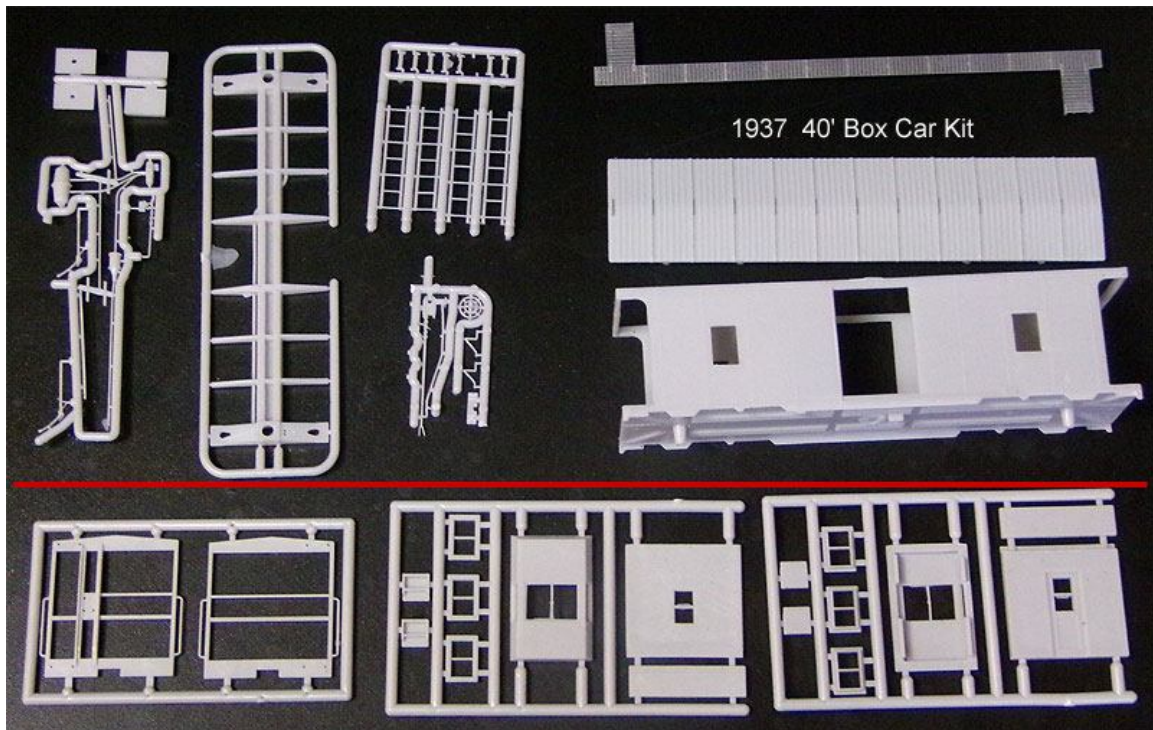

In early 2015 we started the work in designing the "Bay Window Box Car Kit" for the 1937 40' box car kit. A lot of time and money has been spent into this project in the last 2 years, more than it has been worth. Everything is ready for the mold injection production run of these kits. If we make 200 of these kits our total cost would \$40 each at no profit. To make a profit we would have to retail 3 sprue parts (*below the red line*) for \$49.95 or more.

Now if we go ahead and get the 1937 40' box car kit and have them laser cut for our bay window parts kit, this would be another \$50 each. This brings our total cost to around \$90 each, we would have to sell them at \$119.95 just to make a small %. The only thing not included would be the caboose trucks and wire grab irons. We must question is a undecorated bay window box car kit worth between \$125 and \$155.

Undecorated Box Car Kit with Viking Roof: \$19.95

Laser Cut Box Car Kit: \$ 59.95

Bay Window Parts Kit: \$ 49.95
